

Small Book Storage

1. Print this page - be sure your printer dialog box is set to 100% or your box will be too small. A measurement is provided at the bottom to help with scale.
2. Cut out the shapes below, trace them on to "tag board" (shirt cardboard) or a cereal box and cut them out. If you want to get detailed about this, pay attention to the board's "grain" (you will notice it wants to fold more easily one way vs. another). Look up paper grain on the internet for more info...or just ignore this, it will be fine.
3. Fold where indicated. For best results score the lines lightly with an exacto knife or your fingernail before you fold (don't cut through).
4. Assemble as shown using tape, and decorate as desired.
